Idea & Innovation Hackathon 2026

2 Day Hackathon

Event Guidelines · Terms & Conditions · Day-wise Schedule · Standard Operating Procedures

Overview

Everything you need to know before, during, and after - eligibility, rules, the full schedule, and how the event runs on the ground.

Duration	Team Size	Format	Eligibility
2 Days	2 – 4 Members	In-Person	All Students mentioned in the eligibility list

1. Event Guidelines

Read this before you register. It covers who can participate, how teams work, what to submit, and how projects are judged.

1.1 Eligibility

- Open to all students of any program, students currently in class 11 and class 12, and young professionals (Age Group 16 – 25)
- A **valid original ID (showcasing your DOB)** should be carried throughout the event.
- Each participant may belong to only one team.
- Minimum age 16, and maximum age 25 or as per policy.

1.2 Team Formation

- Teams must have 2-4 members. Solo entries are not accepted.
- Cross-department and cross-year teams are welcome.
- Solo participants are not allowed.
- Team composition is locked once registration happens, except with written organizer approval.

1.3 Registration

- Registration closes on the published deadline.
- **Team Registration fees: 499/- (Group of 2-4) & Visitor Registration fees: 99/- (single visitor)**
- One member is designated team lead and handles all official communication.
- A confirmation email is sent within 48 hours - bring it (digital or printed) to check-in.

1.4 Themes & Tracks

- **Problem Statement 1: AI-Powered Career Readiness & Employability Platform**

Domain

Artificial Intelligence | Higher Education | Skill Development | CareerTech

Background

Thousands of students graduate from colleges every year, but many lack awareness of industry expectations, career opportunities, internships, certifications, and suitable employment pathways. Institutions also struggle to provide personalized career guidance at scale.

A digital AI-powered platform can bridge the gap between campus learning and industry readiness by providing personalized career roadmaps.

Challenge

Design an AI-enabled platform that can:

- Analyse student profiles and academic records
- Recommend career paths
- Suggest skill gaps
- Recommend online courses and certifications
- Match internships and job opportunities
- Generate AI-based resume improvements
- Conduct mock interviews
- Recommend government employment opportunities

Expected Outcome

A solution that improves employability and supports the vision of **Campus to Corporate**.

Alignment

- NEP 2020
- Skill India
- Digital India
- Viksit Bharat 2047

- **Problem Statement 2: Smart University Digital Campus**

Domain

Digital Governance | Education ERP | AI | Automation

Idea & Innovation Hackathon 2026

Innovate for Madhya Pradesh. Build for Viksit Bharat.

Background

Many colleges continue to operate fragmented systems for admissions, attendance, examinations, fee management, grievance handling, student services, and academic administration. Students often visit multiple offices for routine services.

Challenge

Design a unified Smart Campus platform capable of integrating:

- Student lifecycle management
- AI Chat Assistant
- Digital Certificates
- Hostel Management
- Transport
- Attendance
- Timetable
- Fee Payments
- Student Helpdesk
- Parent Portal
- Mobile App

Include AI features such as:

- Voice Assistant
- Predictive student performance
- Early dropout prediction
- Personalized learning recommendations

Expected Outcome

A unified digital campus improving governance, transparency, and student experience.

Alignment

- Digital Campus
- Ease of Governance
- Smart Universities
- Viksit Bharat
- [**Problem Statement 3: AI-Driven Examination & On-Screen Marking Transformation**](#)

Domain

Assessment Technologies | AI | Examination Reforms

Background

Universities conduct large-scale examinations involving answer sheet evaluation, moderation, result preparation, and quality assurance. Traditional evaluation methods are time-consuming and prone to delays and inconsistencies.

Challenge

Develop innovative solutions to enhance **On-Screen Marking (OSM)** and digital evaluation by incorporating AI and analytics.

Possible features include:

- AI-assisted answer evaluation support

Idea & Innovation Hackathon 2026

Innovate for Madhya Pradesh. Build for Viksit Bharat.

- Automated detection of unchecked answers or marking anomalies
- Examiner performance analytics
- Smart moderation workflows
- Handwriting recognition assistance
- AI-generated evaluation summaries
- Real-time evaluation dashboards
- Malpractice or unusual scoring pattern detection
- Faster result processing
- Mobile-enabled examiner interface

Expected Outcome

A scalable digital evaluation ecosystem that improves transparency, consistency, speed, and quality of university examinations.

Alignment

- Examination Reforms
- Digital Assessment
- Academic Excellence
- Digital India
- Viksit Bharat 2047

- **Problem Statement 4: Digital Inclusion for Rural Higher Education**

Domain

EdTech | AI | Inclusive Education

Background

Students from rural and tribal regions often face challenges such as:

- Limited internet connectivity
- Language barriers
- Lack of career awareness
- Limited access to quality educational resources

Challenge

Develop an innovative platform that enables inclusive digital learning through features such as:

- Offline-first learning
- Regional language support
- AI-powered doubt resolution
- Voice-based interaction
- Low-bandwidth optimization
- Government scholarship discovery
- Digital mentoring
- Career counselling

Idea & Innovation Hackathon 2026

Innovate for Madhya Pradesh. Build for Viksit Bharat.

Expected Outcome

A solution that democratizes access to quality higher education across Madhya Pradesh.

Alignment

- Inclusive Education
- Digital India
- Viksit Bharat
- Sustainable Development Goals

• Problem Statement 5: AI Innovation for Public Services & Citizen-Centric Governance

Domain

GovTech | Artificial Intelligence | Digital Public Services

Background

Government departments increasingly require intelligent digital solutions that improve service delivery, reduce processing time, and enhance citizen experience.

Young innovators can contribute by designing AI-powered applications addressing real public challenges.

Challenge

Develop an AI-based solution that improves any public service related to:

- Education
- Scholarships
- Recruitment
- Citizen grievance redressal
- Healthcare
- Agriculture
- Transport
- Tourism
- Urban governance
- Rural development

Possible technologies include:

- Generative AI
- Voice Bots
- Computer Vision
- OCR
- Predictive Analytics
- Conversational AI
- Mobile Applications

Expected Outcome

Scalable, citizen-centric digital innovations that enhance governance and improve quality of life.

Alignment

- Digital India
- AI for All
- Ease of Governance
- Viksit Bharat 2047
- **Problem Statement 6: Resilient & Trustworthy Online Assessment Ecosystem**

Domain

Online Assessment | EdTech | AI | Examination Technology | Digital Governance

Background

Large-scale examinations and assessments are increasingly moving towards digital and online modes. However, technical failures, operational challenges, security incidents, data inconsistencies, or other unforeseen disruptions can lead to examination delays, re-conduct of examinations, increased costs, and significant inconvenience to candidates. Such incidents can affect not only the examination process but also the **confidence and trust of students and other stakeholders** in the assessment system.

The challenge is to build a technology-driven assessment ecosystem that is **reliable, transparent, secure, resilient, and capable of responding effectively to unexpected disruptions**.

Challenge

Design an innovative solution for conducting large-scale online or computer-based assessments with minimum disruption and maximum reliability.

The solution may address one or more of the following:

- Real-time monitoring of examination infrastructure and candidate sessions
- Early detection and prediction of technical or operational failures
- Automated incident detection, classification, and escalation
- Backup and disaster-recovery mechanisms for examination continuity
- Secure and tamper-evident storage of examination and response data
- Intelligent identification of suspicious or abnormal examination patterns
- Automated reconciliation and validation of candidate responses and examination data
- Candidate communication and real-time status updates during disruptions
- Intelligent decision support for determining whether an examination needs to be rescheduled or reconducted
- Mechanisms to ensure fairness and consistency when an examination is disrupted
- Post-examination audit trail and evidence-based reporting
- AI-powered analytics to identify systemic risks and prevent recurrence

The solution should focus on "**Prevention → Detection → Response → Recovery → Trust**" across the complete assessment lifecycle.

Expected Outcome

A prototype or MVP demonstrating how technology and AI can make large-scale assessments: •

- **More reliable** – minimizing examination disruptions and downtime
- **More resilient** – ensuring continuity or controlled recovery during unexpected events
- **More secure** – protecting examination and candidate data

- **More transparent** – providing clear evidence and audit trails
- **More responsive** – enabling timely communication and decision-making
- **More trustworthy** – maintaining candidate confidence in the assessment process

The proposed solution should ultimately help **reduce examination disruptions and avoid unnecessary re-conduct of assessments**, thereby saving time and resources while protecting the interests and confidence of candidates.

Alignment

- **Digital India** – Strengthening technology-enabled public services
- **NEP 2020** – Promoting technology-enabled and transparent assessment systems
- **Viksit Bharat 2047** – Building reliable, scalable, and citizen-centric digital infrastructure
- **Digital Education & Assessment** – Modernizing examination and evaluation processes
- **Good Governance** – Improving transparency, accountability, and service reliability
- **Trust in Digital Public Infrastructure** – Ensuring dependable and secure digital services for citizens

1.5 What to Bring

- Laptop, charger, and any personal hardware your project needs.
- Any valid ID proof (which mentions the DOB) and registration confirmation.
- A change of clothes and essentials as it's an overnight event.

1.6 Submission Requirements & Selection Procedure

- Participants are required to develop and bring solutions aligned with the theme/track selected at the time of submitting the application form. The respective presentation/solution should be prepared in advance and submitted online between 15th September to 30th September.
- From the online submissions, 15 teams for Technical and 15 teams for Non-Technical will be selected for the semi-finals on 9th October at the venue.
- Further from the semi-final round, 5 teams for Technical and 5 teams for Non-Technical will be further selected to the Finale round.
- Theme/ track cannot be changed once submitted.
- Working prototype/demo, source code repository link, solution, and tech stack.
- A 5 to 10 minutes pitch deck, max 10 slides.
- Late submissions are not evaluated, no exceptions.

1.6.1 Documents required for initial online screening of projects:

#	Document / Submission	Mandatory	Technical	Non-Technical	Purpose for Panel
1	Solution Synopsis / Executive Summary	☒	☒	☒	Quickly understand the proposed solution

Idea & Innovation Hackathon 2026

Innovate for Madhya Pradesh. Build for Viksit Bharat.

2	Solution Presentation – PDF	☒	☒	☒	Evaluate concept, approach, innovation and overall solution
3	Problem Statement & Proposed Solution	☒	☒	☒	Assess whether the solution genuinely addresses the identified problem
4	Innovation & Differentiation Note	☒	☒	☒	Understand what is innovative/different about the solution
5	Impact & Benefits Document	☒	☒	☒	Assess expected social, economic, educational, governance or user impact
6	Implementation / Feasibility Plan	☒	☒	☒	Determine whether the solution can realistically be implemented
7	Technology Architecture / Technical Approach	Conditional	☒	—	Evaluate technical architecture, technology choices, scalability and security
8	Prototype / Demo / Proof of Concept	Recommended	☒	☒	Establish that the solution is more than just an idea
9	Code Repository URL	Conditional	☒	—	Allow technical panel to inspect actual implementation
10	Why Should This Solution Be Selected?	☒	☒	☒	Give participants an opportunity to make their strongest case to the jury

1.7 Judging Criteria

Judging criteria for tech-based participants:

Criteria	Weightage
Innovation & Originality	20%
Problem Understanding	15%
Technical Feasibility	15%
Prototype / MVP	20%
Impact on Higher Education / Governance	15%
Scalability & Sustainability	10%
Presentation & Demo	5%

Judging criteria for non-Tech based participants:

Criteria	Weightage
Problem Understanding	10%
Innovation & Creativity	15%
Solution Quality	15%
Technical Implementation	20%
UX / Design	10%
Feasibility & Scalability	10%
Impact / Value	10%
Presentation & Demo	10%

Code of Conduct: Respectful behaviour toward all participants, mentors, volunteers, and judges is mandatory. Harassment, discrimination, or disruptive behaviour of any kind results in immediate disqualification and removal from the venue.

2. Terms & Conditions

Every participant must agree to the following terms.

2.1 Originality of Work

All code; designs, idea and content must be created/ revamped during the hackathon window. Previously built or previously submitted projects are not eligible and will be disqualified if discovered. **Strictly no changes will be entertained in a project/ solution after submission.**

Open-source libraries, public APIs, and starter templates may be used if disclosed with attribution in the submission. AI coding assistants are permitted; teams should be able to explain and demo any code they submit.

2.2 Initial Screening Process

The initial selection of teams will be based on their project submissions. These submissions will be reviewed and evaluated by a panel of judges, following which the shortlisted teams will be invited to participate on the Hackathon Day.

Timeline for submission of projects/solution/presentation: 15th September to 30th September.

Selected Teams will be communicated through email. Please note that, registration fees are non-refundable in case teams are not selected for the final hackathon event.

2.3 Intellectual Property

MPOnline Limited will retain full ownership of a project/ solution made/ presented during the hackathon event. By submitting, teams grant MPOnline a non-exclusive, royalty free license to showcase and promote the project (screenshots, demo videos, descriptions, solutions, software etc).

2.4 Disqualification

Grounds include plagiarism, use of pre-existing projects, Code of Conduct violations, missing the submission deadline, false registration information, or tampering with judging. Organizers' decisions are final and cannot be challenged.

2.5 Liability & Safety

Participants attend at their own risk. Organizers are not liable for loss, theft, or damage to personal belongings, or for injury/illness on venue premises except cases caused by proven organizer negligence.

2.6 Media & Publicity

The event may be photographed, filmed, or live-streamed. Registering constitutes consent to appear in event media used for promotional purposes, unless organizers are notified in writing beforehand.

2.7 Data Privacy

Information collected at registration is used only for event administration and communication, and is not shared with third parties without consent, except where required by law.

2.8 Changes to the Event

Organizers may modify the schedule, venue, judging panel, tracks, or prizes due to unforeseen circumstances, with reasonable notice to registered participants.

2.9 Prizes

Prize disbursement is subject to winners completing any required verification or documentation. Prizes are nontransferable and not exchangeable for cash unless stated otherwise. Following are the prize categories:

Technical participants:

1st Prize: 1,00,000/- INR

2nd Prize: 75,000/- INR

3rd Prize: 50,000/- INR

Non-Technical participants:

1st Prize: 50,000/- INR

2nd Prize: 35,000/- INR

3rd Prize: 25,000/- INR

Special Prizes (For Non-tech and Tech participants each):

Idea & Innovation Hackathon 2026

Innovate for Madhya Pradesh. Build for Viksit Bharat.

Best Presentation: 15,000/- INR

(For the participant/team delivering the most compelling and impactful technical presentation.)

Best Solution: 15,000/- INR

(For a solution demonstrating strong problem-solving, innovation and practical potential.)

Best Idea: 15,000/- INR

(For an original and promising technical idea with high potential for future development and impact.)

2.11 T-Shirts

T-Shirts will be given to the selected/shortlisted teams after careful scrutinization of their project solutions on the day of the Hackathon event.

2.12 Acceptance

By completing registration, participants confirm they have read, understood, and agree to these Terms & Conditions and the Event Guidelines above.

2.13 Participation

A single participant is allowed to participate in one group at a time. Multiple participation of a single participant through different groups is strictly not allowed and will lead to disqualification of the respective participant.

3. Day-wise Session Plan

Day 1 - Kick-off to Morning Session

Time	Session	Details
08:00	Check-in & Registration	ID + confirmation verification, team kits, workspace allotment.
09:00	Opening Ceremony & Welcome Address	Introduction to the session and welcoming everyone.
09:30	Keynote: Theme & Track Briefing	Briefing of the themes and track
09:45	Team Formation Session	Team formation details
10:15	Rules, Judging Criteria & SOP Walkthrough	Judging criteria, Mentoring process
10:30 - 12:30	Hackathon begins (Presentations)	Presentations by respective technical and non-technical teams in front of jury members.
12:30 - 13:30	Lunch Break	
13:30 - 15:30	Hackathon Presentation Continues	Presentations by respective technical and non-technical teams in front of jury members.
15:30 - 16:30	1 st Level Qualifier Deliberation and Announcement	First level of selections will be deliberated and announced. Only selected teams will move ahead to 2 nd round.
16:30- 17:00	Snack & Energizer Break	
17:00 - 18:00	Finale Round Briefing	Idea validation, briefing and discussion with the assigned track mentor with the finalists.

Idea & Innovation Hackathon 2026

Innovate for Madhya Pradesh. Build for Viksit Bharat.

18:00	Dispersal for DAY 1	
-------	---------------------	--

Day 2 – Morning Session to Finale

Time	Session	Details
08:00	Check-In	
09:00	Finale Round Presentation Begins	Final idea revamping and presentation in front of the jury team wise on the stage.
12:30	Presentations Concludes	
12:30 – 13:30	Lunch Break	
Time	Session	Details
13:30 – 15:00	Networking and Socializing	Teams/ individuals are open to network with fellow participants and visitors.
15:00 – 16:30	Announcement of Winners & Valedictory Session	Declaring the winners, prize/certificate distribution, event conclusion and thank you note.
16:30 – 17:00	Wrap-Up	

4. Standard Operating Procedures

How the event actually runs - for organizers, volunteers, and anyone who wants to know what happens behind each checkpoint.

SOP-01: Check-in

1. Volunteers will verify valid ID, registration and confirmation at the entry desk.
2. Verified teams receive a team ID card, internet credentials, and a workspace table number/room allotment.
3. Registration mismatches are routed to the registration desk lead for on-the-spot resolution.

SOP-02: Mentorship

4. Mentors are assigned to tracks and rotate through team tables during each mentor round.
5. Teams needing help between rounds join the help-desk queue.
6. Mentors brief the teams about the tracks/ themes and expected outcomes.

SOP-03: Technical Support

7. A dedicated desk that handles internet, power, and hardware issues.
8. Sponsor API/tool issues are escalated to the sponsor's on-site or on-call representative.

SOP-04: Submission

9. For technical submissions, the team must have their projects ready to be displayed on their own system.
10. Every submission is accepted on the spot; instructions will be given on-the-spot.

SOP-05: Judging

- 12.Round 1: judges score demo booths on the standardized rubric via the judging app/sheet.
- 13.Ties are broken by the Innovation & Originality sub-score.
- 14.Round 2: finalists pitch live; judges submit scores independently before deliberation.
- 15.Judges' decisions are final unless a rule violation is proven before prize distribution.

SOP-06: Safety & Emergency

- 16.First-aid location and on-call medical contact are announced at Opening Ceremony and posted at the help desk.
- 17.Fire exits and assembly points are informed; volunteers are briefed on evacuation routes.
- 18.A quiet/rest room is available.

SOP-07: Code of Conduct Enforcement

- 19. Concerns can be reported to any Organizer-badged volunteer or via the help-desk reporting form.
- 20. Reports are reviewed by the Organizing Committee as soon as possible; immediate safety concerns are handled on the spot.
- 21. Consequences range from a verbal warning to disqualification and removal, depending on severity.

SOP-08: Volunteer Shifts

- 22. Volunteers work across Registration, Mentorship, Tech Support, Logistics/F&B.

Frequently Asked Questions

1. What should I bring to the hackathon?

Bring your **laptop, charger, required project hardware, valid ID, and registration confirmation**. Since it is an overnight event (at the venue), also bring a change of clothes and personal essentials.

2. Do I need to have a fully working project before the hackathon starts?

No, Projects must be created during the hackathon. You can use **open-source libraries, public APIs, starter templates, and AI coding assistants**, provided you follow the disclosure and attribution requirements. MPOnline Limited will not bear the cost of licensing for any project/ solutions.

3. Can I choose any problem statement or track?

You need to work on one of the **six problem statements** given in the hackathon, covering areas such as AI, education, digital campuses, online assessment, rural education, and public services.

4. Will mentors be available if my team gets stuck?

Yes. Mentors are assigned to different tracks and will visit team tables during mentor rounds. Teams can also approach the **help desk** if they need assistance between rounds.

5. What do we need to submit at the end?

Your team needs to submit a **working prototype/demo, source-code repository link, a short description of the problem, solution and tech stack, and a 5–10-minute pitch deck of up to 10 slides**.

6. How will our project be judged?

Judges will look at factors such as **innovation, understanding of the problem, technical feasibility, prototype, impact, scalability, working solutions and presentation/demo quality**.

7. Will the organizers provide accommodation during the event?

No, **Accommodation will not be provided by the organizers.** Participants need to manage their own accommodation arrangements.

10. Can we use a project we've already started before the hackathon?

No. The project, code, design, idea, and content submitted must be created during the hackathon duration. Previously built or previously submitted projects are not eligible. However, open-source libraries, public APIs, starter templates, and AI coding assistants are allowed, subject to the stated disclosure and attribution requirements.

11. Will internet and charging points be available?

Yes. Internet credentials will be provided to verified teams at check-in, and a dedicated technical support desk will handle internet, power, and hardware-related issues.

12. Is the hackathon really overnight, and can we work through the night?

No, the event is not designed as an overnight hackathon at the venue. Participants are specifically advised to bring a change of clothes and personal essentials so that they can change at their respective self-arranged accommodations. No overnight stay is designed at the venue.

Note: The participants may carry on working on their respective projects at night at their respective accommodations but not at the event venue.

13. Can we ask mentors to review our idea before we start building?

Yes. All the rounds at the venue are designed to have mentor interactions before their respective presentations specifically for idea validation, working solutions and expected outcomes.

14. If we don't qualify for the finals, can we still continue working on our project?

Yes, you can still continue working on your respective projects even after not qualifying but please note that your project will not be evaluated or you'll be entitled to any prize.

15. Will every team get a chance to present on stage?

Yes every team will get a chance to present on the stage in front of the Jury members.

16. After submitting our project, can we make further changes to it, who retains ownership, and are we allowed to continue developing or commercializing it after the hackathon?

MPOnline Limited will retain full ownership of a project/ solution made/ presented during the hackathon event. By submitting, teams grant MPOnline a non-exclusive, royalty free license to showcase and promote

the project (screenshots, demo videos, descriptions, solutions, software etc). No changes can be made in the project post submission. Participants are allowed to continue developing or commercializing the project after the completion of the hackathon.

17. Who can participate in the MPOnline Idea & Innovation Hackathon 2026?

The hackathon is open to eligible college students, graduates, and working professionals from both technical and non-technical backgrounds between the age group of **16 to 25 years**.

18. Do I need to be from a technical background?

No. The hackathon welcomes both technical and non-technical participants. Technical participants can build prototypes, applications, working solutions, or other technology-driven solutions. Non-technical participants can present innovative solutions through presentations and other appropriate formats.

19. Can non-technical participants participate in the hackathon?

Yes. Non-technical participants are encouraged to bring ideas and present practical, innovative, and research-backed solutions to the selected problem statement.

20. Will travel or accommodation expenses be reimbursed?

No. Participants and visitors will be responsible for their own travel, accommodation, food, and other personal expenses. No travel or accommodation allowance/reimbursement will be provided by the organizers.

21. Is the team registration or visitor registration fee refundable?

No. The registration fee is non-refundable once the registration has been completed and the payment has been made.

22. Can I participate individually?

You can attend the Hackathon as a visitor individually, but to participate in Technical & Non-Technical Sessions, a minimum **2-to-4-member team** is required.

23. Can participants from different colleges or organizations participate together?

Yes. Participants from different colleges, universities, organizations, or professional backgrounds can form a team and participate together.

24. What technologies can I use?

Participants can explore technologies relevant to their selected problem statements. The official guidelines should be referred to for any specific technology restrictions.

25. Can I use Artificial Intelligence or Generative AI?

Participants may explore AI and emerging technologies relevant to their solution. Specific rules regarding AI-assisted development, disclosure, originality, and responsible use should be followed as stated in the official hackathon guidelines.

26. How will my solution be evaluated?

Solutions will be evaluated on Innovation & Originality, Problem Understanding, Technical Feasibility, Prototype/MVP, Impact, Scalability & Sustainability, and Presentation & Demo

27. What are the first, second, and third prizes?**Technical participants:**

1st Prize: 1,00,000/- INR

2nd Prize: 75,000/- INR

3rd Prize: 50,000/- INR

Non-Technical participants:

1st Prize: 50,000/- INR

2nd Prize: 35,000/- INR

3rd Prize: 25,000/- INR

Special Prizes (For Non-tech and Tech participants each):**Best Presentation: 15,000/- INR**

(For the participant/team delivering the most compelling and impactful technical presentation.)

Best Solution: 15,000/- INR

(For a solution demonstrating strong problem-solving, innovation and practical potential.)

Best Idea: ₹15,000/- INR

(For an original and promising technical idea with high potential for future development and impact.)

28. Will participants receive certificates?

Yes. All participants will receive a **Participation Certificate**.

29. When and where is the hackathon?

Idea & Innovation Hackathon 2026

Innovate for Madhya Pradesh. Build for Viksit Bharat.

The MPOne Idea & Innovation Hackathon 2026 will take place at on **09-10 October 2026**, in **Bhopal, Madhya Pradesh**.

30. How can I register?

Click the "**Register Now**" button on the website and complete the official registration process.

31. You can contact the official hackathon support team through:

- **Email:** hackathon@mponline.gov.in
- **Phone:** [+91-7024589934](tel:+91-7024589934), [+91-7880172879](tel:+91-7880172879)

32. What are the problem statements?

- AI-Powered Career Readiness & Employability Platform
- Smart University Digital Campus
- AI-Driven Examination & On-Screen Marking Transformation
- Digital Inclusion for Rural Higher Education
- AI Innovation for Public Services & Citizen-Centric Governance

33. What can technical participants build?

Technical participants should develop software applications, AI/ML solutions, digital platforms, prototypes, working solutions, mobile applications, or other technology-enabled solutions relevant to their selected challenge.
