

समाधान · Samadhan

Every voice will be heard. Try the working prototype below.

1 · Citizen website

samadhan-web.onrender.com
Scan to open

2 · Officer dashboard

samadhan-dashboard.onrender.com
Tap Demo, no login needed

3 · Source code

github.com/krishnakantnagina/Samadhan
Code, specs, tests

Free hosting: the first reply can take a minute while the server wakes up.

Try it in one minute

1 · OPEN

Tap Start Conversation.

2 · SPEAK

Say your problem, in Hindi or English.

3 · ANSWER

Give the place, then say "yes".

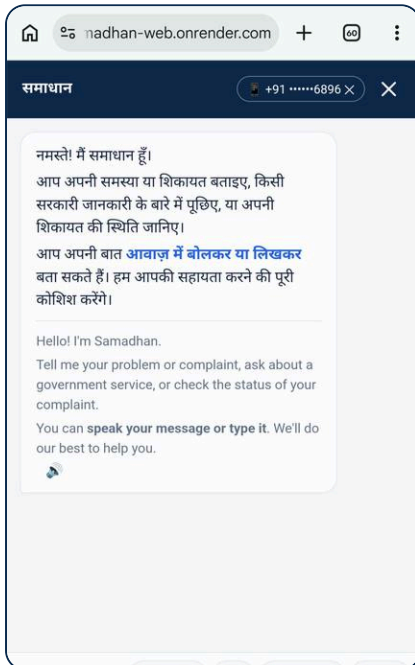

4 · NUMBER

Enter a mobile number. We share the demo PIN.

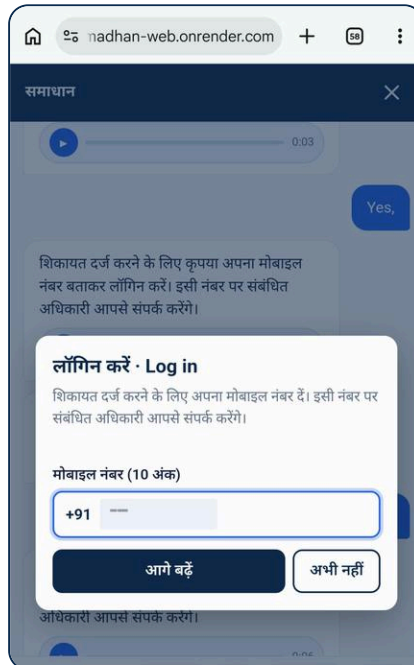

5 · TICKET

Get SMD-xxxx and check status any time.

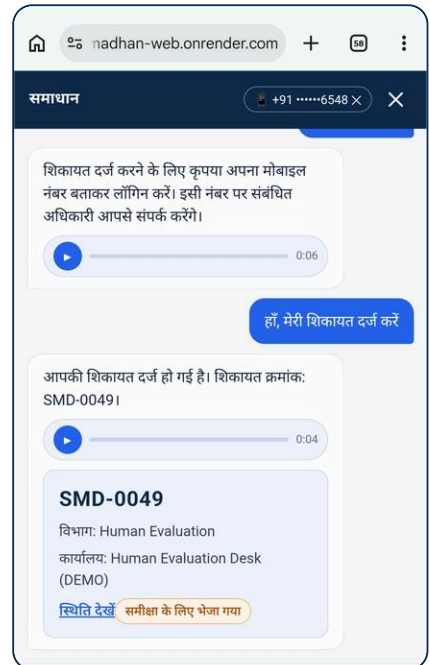

The citizen journey, on a phone

1 · Speak or type

2 · Verify the number

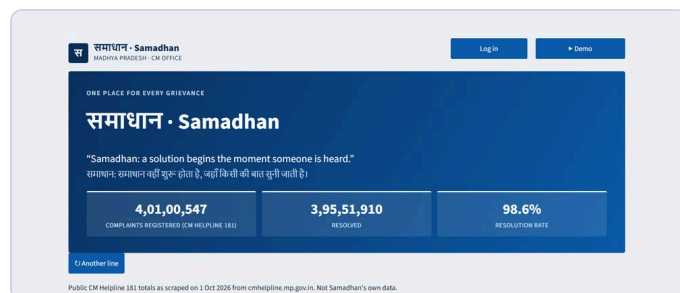

3 · Ticket registered

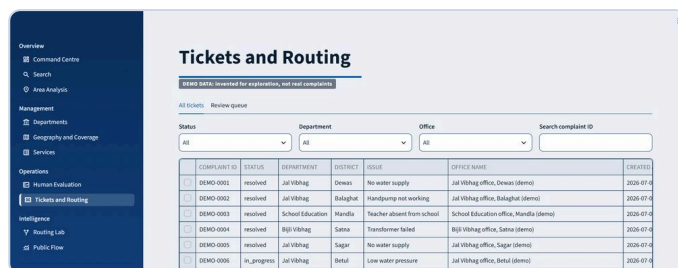

Real screenshots from the live site. The officer can call back on the verified number, and false complaints are discouraged.

The officer side, and why it is needed

The officer side: one central dashboard for the CM office

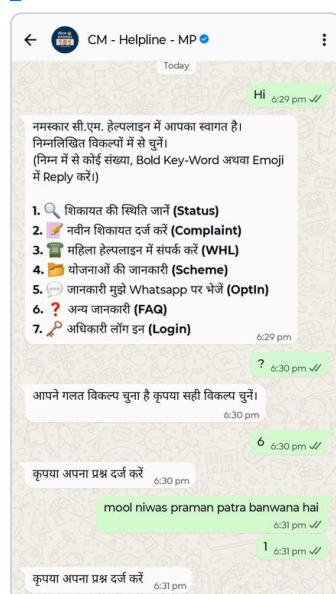

Home: public CM Helpline 181 totals, labelled as not Samadhan's own data

Tickets and routing: filters and a review queue (invented demo data, clearly labelled)

Why it is needed: what we saw in an existing channel

The CM Helpline WhatsApp bot opens with a **numbered menu of 7 options**. When we sent a "?", it said we had chosen a wrong option. When we typed a Hinglish question, no answer came back and it asked for the question again. With Samadhan, the citizen just describes the problem in their own words. This was one short test, not a full evaluation.

What works today, and what does not yet

Works today

- Hindi and Hinglish voice and text, with spoken replies
- **Jev** picks the department; code checks every value
- Mobile login, a ticket, and status by voice or text
- Central dashboard with review queue and map
- About 90% exact routing on 60 test messages; 450 automated tests pass

Honest limits

- Office data is mostly DEMO
- GPS does not yet choose a ward
- Demo PIN now; a real SMS OTP after the SMS licence
- Dialect test data is synthetic
